

STRUCTURAL FUNDS PROGRAMME FOR MALTA 2004-2006
PROJECT PART-FINANCED BY THE EUROPEAN UNION:
ARCHIMED PROGRAMME

Aerobiological Territorial Mediterranean-Oriental Systemic Network ATMOSnet Project

Participation and Recruitment of Personnel (Pre-selection Process)

The Institute of Agriculture is currently striving to transform this entity into a Research Centre of Excellence, in line with the provisions of the National Strategy on Research and Innovation for 2007-2010, issued by the Office of the Prime Minister in August 2006.

Already, many initiatives and activities have been launched and collaboration initiated with other research centres across Europe. Our intention is to open up opportunities both for our current and prospective students in all fields and levels of study.

It is our pleasure to invite you to actively participate in the Interreg III B Project Code A.1.076, ATMOSnet, funds for which had been providentially given to us by the European Union.

Since the personnel to be recruited for the purposes of this project need necessarily to have sound knowledge of Agricultural Sciences or else are already engaged in some form of study in this discipline, we are extending this call for application to past and present students of the Institute.

Vacancies exist for the following posts:

Project Coordinator, Operations Manager, IT Manager, Quality Assurance Manager, Research Officers, Research Assistants/Lab Technicians, Field Researchers/Field Officers, Data Input Operators

You are kindly requested to submit a full curriculum vitae (cv) to the Director of the Institute of Agriculture by not later than 19th October 2006 at noon or sent by email to george.attard@um.edu.mt or everaldo.attard@um.edu.mt.

Selected applicants may be requested to undertake a training course abroad. This is a pre-selection process. Therefore selected applicants would then have to satisfy the terms and conditions of the University of Malta.

For further information about the project please contact everaldo.attard@um.edu.mt.

Dr. George Attard
Director
Institute of Agriculture
